

# LUCKY BEAVER PROFESSIONAL INFIELDMIX

**Lucky Beaver Professional Infield Mix** is a unique blend of clay, silt, and sand that has been specifically designed to meet the high demands of professional standards. This soil mix is meant to increase compaction and enhance the overall performance on any infield. Screened down to 3/16", this infield mix requires proper moisture management to maintain its highest performance.

**Lucky Beaver Professional Infield Mix** provides an elite playing surface to programs looking to increase the performance of their infield. With proper moisture management, this material will hold its shape, compact nicely, and offer an extremely fast playing surface. Though this elite blend soil blend was designed for professional level of play, it is an excellent mix for any Division I softball and baseball program.

### Lucky Beaver Professional Infield Mix Tips:

1. Remember to condition your infield with soil amendments. We recommend using 20% by volume to see best results. Though our custom soil blends have been designed to meet a professional's standards, conditioning your infield helps with moisture management, absorption, soil strength, and recovery.
2. The final step in creating an all weather field, one that will allow play long after the other teams have gone home, is Top Dressing your infield with 1/4" of Calcined Clay or Diatomaceous Earth. Both products will help the surface of your infield retain moisture.

### Recommended Application when renovating an infield:

**Lucky Beaver Professional Infield Mix** should be put down to a depth of 3" - 6" on a standard infield renovation. Once laid evenly, we suggest watering your infield with 1/2 inch of water, rolling it with a 1000 pound roller to achieve proper compaction, and then laser grading it out at 1/2%.

INFIELDMIX  
RENOVATION

|                            | Infield        | 1" Depth | 3" Depth | 6" Depth  |
|----------------------------|----------------|----------|----------|-----------|
| <b>Baseball Coverage</b>   |                |          |          |           |
| 90' Bases (Grass Infield)  | 11,550 sq. ft. | 32 Yards | 96 Yards | 192 Yards |
