

LUCKY BEAVER PLUS PROFESSIONAL INFIELDMIX

Lucky Beaver Plus Professional Infield Mix has been designed to enhance the overall performance of your infield. It is the ultimate soil blend, customized to meet each groundskeeper's environment, level of play, and budget. By combining a multitude of very specific soil amendments with an elite infield soil this material gives any field the professional look and feel that all groundskeepers, coaches, and players require.

Lucky Beaver Plus Professional Infield Mix provides a high quality playing surface to programs looking to increase their field's playability. It is an excellent solution for both wet and dry environments. Once compacted, this material will reduce soil migration, increase recovery, increase soil strength, and play extremely true. Though this blend was designed for Professionals, it is an outstanding playing surface that can be used by all levels.

Lucky Beaver Plus Professional Infield Mix Tips:

1. Though your choice on which infield soil and amendments to use are important, a proper gradation on your infield should be your first priority.
2. Without proper moisture management, it will not matter what type of soil and amendments you use to prepare your infield. For example, on a clay based infield too little water means you are playing on a rock hard surface and too much water means you are playing in a bog. Your goal, regardless of soil type, should be to strike a balance between the two.

Recommended Application when renovating an infield:

Lucky Beaver Plus Professional Infield Mix should be put down to a depth of 3" – 6" on a standard infield renovation. Once laid evenly, we suggest watering your infield with 1/2 inch of water, rolling it with a 1000 pound roller to achieve proper compaction, and then laser grading it out at 1/2%.

INFIELDMIX RENOVATION

	Infield	1" Depth	3" Depth	6" Depth
Baseball Coverage				
90' Bases (Grass Infield)	11,550 sq. ft.	32 Yards	96 Yards	192 Yards
