

pro's choice pro mound packing clay

Pro's Choice Pro Mound Packing Clay is a unique blue gumbo packing clay that has been specifically designed to form a solid subsurface in the mound and batter's boxes that allows the players to "dig in" and establish footing without leaving large holes. It is exceptional when used to repair, rebuild, and construct a field's pitching mound, batter's boxes, and catcher's box.

The design philosophy behind using **mound clay** to build your high stress areas is to increase Longevity, increase Durability, and increase Compaction.

Pro's Choice Pro Mound Packing Clay gives high stress areas the durability that professional groundskeepers require. Since it has been designed to meet the performance standards of elite programs, this material requires hydration to easily tamp it into holes, but provides the greatest durability. Mound Clay reduces maintenance for all levels of play. In addition to being a mound material, Mound Clay can be used to firm up the high stress areas of your infield.

Specifications: **Color:** Blue-Grey
 Weight: 64 pounds per cubic foot (Dry) = 1.15 Yards:1 Ton
 Volume: 1 Bag = 50 lbs = .78 Cubic Foot
