

TRIPLE PLAY PROFESSIONAL MOUND CLAY

Triple Play Professional Mound Clay™ is a elite red packing clay that has been specifically designed to withstand the stress of high traffic areas and players "digging in." It is exceptional when used to repair, rebuild, and construct a field's pitching mound, batter's boxes, and catcher's box.

The design philosophy behind using **mound clay** to build your high stress areas is to increase Longevity, increase Durability, and increase Compaction.

Dark red in color, **Triple Play Professional Mound Clay™** gives high stress areas the durability that professional groundskeepers require. Though it has been designed to meet the performance standards of elite programs, this material easily tamps into holes, provides greater durability, and reduces maintenance for all levels of play. In addition to being a mound material, Mound Clay can be used to firm up the high stress areas of your infield.

Grey Area - High Stress ONLY		# of Mound Clay Bags		
Area	Size	2"	4"	6"
Table	34" x 60"	7.5	15	22.5
