

LOUISVILLE SLUGGER GAME TIME CLASSIC TOP DRESSING

Louisville Slugger Game Time Classic is a thermally optimized montmorillonite clay that can be laid on the surface area of baseball and softball fields to improve traction and moisture retention. This product will not stick to cleats and will incorporate into the infield if needed.

The design philosophy behind using calcined clay as a **top dressing** focuses on good Moisture Retention, Uniform Particles, and Dust Control.

Tan in color, **Louisville Slugger Game Time Classic** gives an infield the professional look and feel that all coaches and players require. When laid on the surface of an infield, this premium calcined clay keeps infields smooth, safe and resilient. This material is at its best when used as a Top Dressing, as it decreases dust, improves color, and helps control excess moisture.

Recommended Applications:

When used as a Top Dressing:

Spread 1/4" of Pro's Choice Select evenly over the surface of your infield, lightly rake, and then play.

Coverage Rates:

1.5 Tons will cover 1,000 sq. ft. at a depth of 1 inch.

If used as an Infield Conditioner:

Amend Game Time Classic into your soil profile at a rate of 20% by Volume.

Specifications:

Available Colors: Tan

Weight: 38 pounds per cubic foot = 1.95 Yards:1 Ton

Absorption: 57% Absorption

Availability:

Bags: 50 lbs. each, 40 bags per Pallet
